

RESIDENTIAL CONSTRUCTION - \$1000.00

Monday & Wednesday 6:00 – 9:00 - 75 hours (25 meetings)

Planning a remodeling project? A new kitchen or addition? Building a new home? Do you have questions about working with contractors or building and zoning officials? Or, would you like to become more familiar with some basic construction tools and building techniques, maybe for potential employment? If so, then this course which focuses on **Residential Construction** is for you. We offer instruction on home construction planning, layout, and estimating. Get “hands-on” experience using power tools and pneumatic fasteners, reading and understanding blueprints, quotes and estimating. General jobsite safety instruction provided by the OSHA 10 hour Certification course, as well as safe and proper ladder use provided by the American Ladder Institute Certification course. The instruction process is adaptable and can be tailored to the needs of the class.
